## Professional Summary

Detail-oriented QA Tester and BS Information Technology student with hands-on experience testing and developing web applications from requirements through deployment. Served as the developer of a capstone system delivered for a local government office, including functional, usability and cross-browser testing before release. Combines a developer's understanding of how software is built with a careful eye for defects, and seeks to help a technology-driven team ship reliable, user-friendly products.

## Education

**Bachelor of Science in Information Technology** **2023 – Present**
*Sorsogon State University – Bulan Campus, Zone 8, Bulan, Sorsogon*
Relevant coursework: Software Engineering, Database Systems, Web and Mobile Development, Human–Computer Interaction

## Projects

**Bulan Senior Care** **bulan-senior-care.vercel.app**

- **Built** a records-management module and administrative dashboard that lets OSCA staff register, search and update senior-citizen profiles in one secure, searchable system.
- **Implemented** per-beneficiary benefits tracking, giving staff a clear, up-to-date view of benefits released.

*Technologies:* React, Node.js, Express, MySQL, Vercel, Railway

**Equalize Gender** **equalize-gender.vercel.app**

- **Developed** a gender awareness and inclusion platform with interactive Chart.js visualizations of official Philippine data, making gender-based violence statistics easier for the public to understand.
- **Created** a myth-or-fact quiz and resources based on RA 9262, 9710, 11313 and 11596, helping users learn their rights.

*Technologies:* React, TypeScript, TanStack Start, Tailwind CSS, Chart.js, Vercel

**Personal Developer Portfolio** **gojar-portfolio.vercel.app**

- **Engineered** an animated portfolio with a serverless backend (contact form, admin inbox, view counter) to showcase my work.

*Technologies:* React, Vite, Tailwind CSS, Framer Motion, Vercel Functions, Upstash Redis

## Experience

**Capstone Project Developer** **2024 – 2026**
*Sorsogon State University – Bulan Campus*

- **Developed** Bulan Senior Care for the Office for Senior Citizens Affairs (OSCA) of Bulan, delivering a live system that centralizes senior-citizen records and benefits tracking for local government staff.
- **Built** the frontend, REST API and database, and deployed the full-stack application to production on Vercel and Railway.
- **Collaborated** with team members through Git and GitHub, turning their requirements and feedback into working features through final defense.

## Skills

| | |
|---|---|
| **Frontend:** | React, JavaScript, TypeScript, HTML, CSS, Tailwind CSS |
| **Database:** | MySQL, Supabase |
| **Tools:** | Git, GitHub, Vite, Vercel, Railway, Netlify, Figma, AI coding tools (Claude Code, Codex, ChatGPT) |
| **Other Skills:** | Teamwork and Collaboration, Problem Solving, Time Management, Adaptability, Fast Learner |

## Additional Information

- **Languages:** English, Filipino
- **Availability:** Open to internship, part-time, full-time and remote opportunities
